

NATURESAVE COMMERCIAL INSURANCE

Environmental Performance Reviews

- All Naturesave commercial policies include a free Environmental Performance Review (EPR). The objective of the EPR is to establish to what extent an organization is meeting the growing demand for sustainable development and completion of its recommendations will demonstrate to your customers your commitment to sustainable development.
- The EPR will be conducted by an independent, fully-qualified environmental surveyor at a time of your mutual convenience.
- We believe that continuous improvement of environmental performance improves both a business's reputation and its access to environmentally sensitive markets. It encourages repeat business and creates real opportunities to reduce waste, lower costs and increase efficiency.
- The recommendations are not mandatory, but on receipt of written confirmation that they have been adhered to, we will provide you with an Environmentally Aware Trading Certificate (EATC) for display within your premises.
