

The Naturesave Trust is keen to support those projects with a long term benefit which deal proactively with the root of a particular problem as opposed to merely reacting to the effects.

The projects considered must be from environmental and conservationist groups and organisations who seek funding for **specific projects** and not the general administrative costs of their respective organisations. We are unable to fund projects that are not wholly based within the UK, or from individuals. Please try to keep your responses to questions brief and concise. Please note that there are no deadlines for applications, which are dealt with on a rolling basis. If you have any queries about your application, please call Bee West, Trust Administrator, on 01803 864390.

1. Name of Project	
2. Objective of project	
3. Timescale for completion	
4. Details of work already done	
5. What problem is the project intending to resolve?
