

Wild Futures Wildlife Celebration

April 2016

Wild Futures is a registered charity founded upon five decades of experience as a leader in the field of primate welfare and conservation, environmental education and sustainable practice. We are committed to protecting primates and habitats worldwide, with the protection of non-human primates at the forefront of our work.

Our safe haven for monkeys rescued from situations of abuse and neglect is The Monkey Sanctuary in Cornwall, which has an international reputation for levels of care and innovative management techniques. We work closely with other organisations to lobby local and central government to bring about positive change for primates. We also support projects overseas with funding, practical assistance and advice and believe that education is vital in changing things for the better; educating more than 30,000 visitors and students on our work each year.

As well as rescuing and housing monkeys we also preserve around half of our site for native Cornish wildlife. We have a purpose built wildlife room which holds a variety of activities and information displays regarding the wildlife and habitats which we are conserving here onsite. The wildlife room had become in desperate need of renewal, particularly for education materials, such as new audio technology and interactive displays. As a small charity it can be difficult for us to fund projects like this and without The Naturesave Trust it would not have been possible for us to complete this aspect of the project, so we are extremely grateful for their help.
