

West Solent Solar Cooperative Ltd.

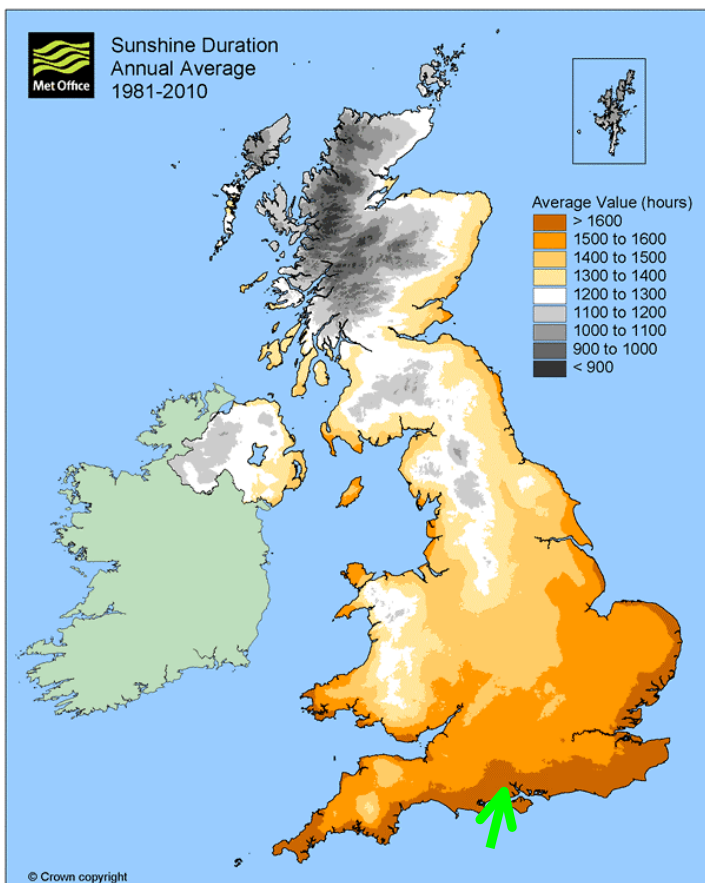

November 2013

And God said, "Let there be light" and there was light, but the Electricity Board said He would have to wait until Thursday to be connected...

Spike Milligan

We hope to do better....

West Solent Solar Cooperative is a community energy project on the south coast near Lymington. It is developing a 2.5MW solar project in the sunniest place in the UK. The site is a 12 acre field, recently restored after a decade of gravel extraction.

Full details of the project are on our website: www.westsolentsolar.coop

Planning permission is about to be granted. Specialist consultants are negotiating the grid connection.

We are working with Energy4all who will lead the fund raising.

We will be making a public share issue in January. Priority will be given to residents of the New Forest District Council, followed by Hampshire and Dorset. We are applying for the Enterprise Investment Scheme (EIS).

West Solent Solar Cooperative Limited is an Industrial & Provident Society and regulated by the FCA.
